

Kytola Model 2851 Constant Flow Regulator is a sturdy, industrial constant flow regulator designed to provide constant flow of liquids or gases regardless of pressure variations.

Model 2851 is intended for low liquid flows in applications where supply or backpressure varies and for gas flows in applications where backpressure varies.

Model 2851 equipped with model L flow meter

- For liquid and gas
- Reliable operation
- Easy maintenance
- Max. flow  
3 L/min H<sub>2</sub>O  
100 NL/min air (6 barg)
