The KYTOLA® Seal Water Flow Meter Model SLM protects your seal and reduces downtime. Significant savings are achieved in maintenance and seal water costs.

**FEATURES**
- Reliable operation
- Solid construction
- Reduced seal maintenance
- Built-in cleaner does not interfere with operation
- Excellent corrosion and heat resistance
- All models alarm-ready
- Clear metering scale

**SLM APPLICATIONS**
- Single and double mechanical seals
- Gland packings
- Flush water
- Purging
- Other flow measurement

**SLMx-2 APPLICATIONS**
- Double mechanical seals
SLM Seal Water Flow Meter

Most pumps, agitators, refiners, screens etc. with shaft seals require an uninterrupted sealing water flow to ensure proper function of the seal. The purpose of seal water is to:
- Cool the seal
- Lubricate the seal
- Prevent the process media from entering the seal chamber

Also the seal condition can be determined by proper monitoring of the seal water flow and pressure.

Stop pouring money into the drain
Adequate cooling and lubrication are essential for any kind of seal. However, uncontrolled flow may multiply the necessary water and energy consumption. It is easy to create huge savings in costs by reducing excess water flow with accurate and proper adjustment of seal water flow and pressure.

The Kytola SLM Seal Water Flow Meter is especially designed for applications on pumps and mechanical seals in processes and applications where uninterrupted seal water flow is required.

Easy maintenance reduces down time
The built-in cleaner is designed not to interfere with operation. It effectively removes built-up contaminants. The long, clear metering scale guarantees visibility and easy inspection of flow level.

Innovative design offers durability and flexibility
The various Kytola seal water flow meter models guarantee compatibility with all seal types. The strong and compact design ensures maximum resistance to external impact.

The SLM has been specially optimized to withstand contaminated water. Reliable and accurate flow measurement is based on a variable area metering principle using a free-floating float. The seal water flow meter can also be easily equipped with an alarm output by utilizing an inductive proximity sensor.
### QUENCH SEALS

**SLM**

**Double Mechanical Seals**

**SLM with pressure gauge and pressurizing valve**

**Optional Accessories**

- Inductive prox. sensor 20 – 250 VAC/DC (ILK-M18-AB) **A**
- Inductive prox. sensor 10 – 55 VDC (ILK-M18-FR) **F**
- Intrinsically safe NAMUR sensor, 10 mm range (ILK-M18-N-10) **I**
- Pressure gauge 0 – 10 bar **G**
- Pressure gauge 0 – 25 bar **E**
- Standard POM body with optional borosilicate glass flow tube (instead of standard PSU tube) **L**
- Optional PVDF body (with borosilicate glass flow tube) **K**
- Optional PVDF body (with PSU flow tube) **KM**
- Pressurizing valve **P**
- Floor mounting stand **S**

**Connectors**

- 10 mm hose barb connectors, standard **leave empty**
- 10 mm straight tube connectors for compression fittings **R**
- 3/8” straight tube connectors for compression fittings **N**

*Example: SLM3-AAG (= Flow rate 0.1 – 3 L/min, alarm range 0.4–2 L/min, inductive prox. sensor 20–250 VAC/DC, pressure gauge 0–10 bar, pressurizing valve, 10 mm hose barb connectors)*

### SINGLE SEALS AND PACKINGS

**Optional Accessories**

- Inductive prox. sensor 20 – 250 VAC/DC (ILK-M18-AB) **A**
- Two inductive prox. sensors 20 – 250 VAC/DC (ILK-M18-AB) **AA**
- Inductive prox. sensor 10 – 55 VDC (ILK-M18-FR) **F**
- Two inductive prox. sensors 10 – 55 VDC (ILK-M18-FR) **FF**
- Intrinsically safe NAMUR sensor, 10 mm range (ILK-M18-N-10) **I**
- Two intrinsically safe NAMUR sensors, 10 mm range (ILK-M18-N-10) **II**
- Pressure gauge 0 – 10 bar **G**
- Pressure gauge 0 – 25 bar **E**
- Standard POM body with optional borosilicate glass flow tube (instead of standard PSU tube) **L**
- Optional PVDF body (with borosilicate glass flow tube) **K**
- Optional PVDF body (with PSU flow tube) **KM**
- Floor mounting stand **S**

**Connectors**

- 10 mm hose barb connectors, standard **leave empty**
- 10 mm straight tube connectors for compression fittings **R**
- 3/8” straight tube connectors for compression fittings **N**

*Other connection choices available on request*

*Example: SLM8–2–AAG (= Flow rate 0.5 – 8 L/min, alarm range 1–5 L/min, two inductive prox. sensors 20–250 VAC/DC, pressure gauge 0–10 bar, 10 mm hose barb connectors)*
